FUNCTIONAL RESTORATIONS FOR ALL AGES...

Zirconomer P is the latest generation of self-adhesive, bulk fill, nano-zirconia reinforced restorative (ZRR) material developed for strong and durable posterior restorations.

- **Zirconomer P** exhibits a robust design that strengthens and reinforces tooth structure while providing a secure marginal seal.
- **Strong & stable bond** to natural tooth structure with minimal interfacial stresses to assure greater longevity and optimal dimensional stability.
- **Bulk-fill, self-adhesive** to restore a wide range of cavities in the posterior zone with ease and predictability.

Available in:
Zirconomer P 1-1 SET (REF C0040)
(Powder 12g & Liquid 5ml)

UNIVERSAL APPLICATIONS

- Class I & II Restorations
- Paediatric & Geriatric Restorations
- Silver Modified Atraumatic Restorative Technique (SMART Technique)
- Long-term Transitional Restorations
- Strong Structural Core & Base
- Biocompatible Amalgam Alternative
- Atraumatic Restorative Treatment (ART)

FEATURES

- ✓ **Strong**
 - Compressive strength more than 300 MPa
- ✓ **Simple**
 - Mix – Fill – Finish at one go
 - Reduce Chair time – No Priming, bonding or extensive tooth preparation.
- ✓ **Stable**
 - **No light curing**
Self-adhesive materials eliminates the risk of polymerization shrinkage with minimal post-op sensitivity
- ✓ **Safe**
 - **Biocompatible with no risk of mercury.**
Ideal amalgam alternative that protects against secondary caries with its fluoride rich environment
